

SMOOTHLINE

REPUTATION BUILT ON QUALITY

Nothing beats experience and PPG Fabrications has plenty. With decades of experience in designing and building alloy tipper bodies, we are the UK's premier insulated tipper manufacturer with products recognised for operational efficiency, numerous safety features and quality.

Always flexible in approach, PPG expertise means that products are built to precisely meet your exacting requirements while maximising your revenue with class leading payloads. Smoothline is the premier body for asphalt work.

IT'S THE ATTENTION TO DETAIL THAT MATTERS.

The PPG Smoothline insulated tipper body is designed to be durable, safe and productive.

With the safety of those around the vehicle always in mind, Smoothline has numerous features designed-in to protect your workers, those around them and the public. Payload and your earning

capacity is never far from our mind so with Smoothline, you get the best of all worlds, durable, long lasting bodies with class leading safety, earnings and uptime.

Rear Door

Unique air door safety system preventing unintentional opening of bottom door and injury to operatives. Over centre locks prevent opening on air loss.

Tar Hatches

Developed and tested in conjunction with a national aggregate / roadstone supplier featuring outside fitting and level operated insulated hatches. Door has detachable safety screw clamps and bottom door security pins.

Safe Access

Access ladders and walkways designed to aid 'three points of contact' at all times. Internal steps are self-draining to avoid dangerous build-up of materials.

Insulation

Best in class heat retention from fibre filled walls, sides, door and floor with dual skinned hatches meaning slower asphalt cooling cycles.

Durability

To prevent corrosion, where possible all door furniture is galvanised or made from stainless steel. Hinges and bars are fitted with grease nipples to extend operational life.

Payload

Attention to detail gives a body design and installation that is lighter than other similar products generating as much as £2,000 additional revenue per year on asphalt operations.

Customisation

All bodies are hand-built and can be tailor-made and built to operators specific needs and requirements.

Compliance

All PPG products comply with truck manufacturer's body fitting requirements and come with unique serial number for future reference and traceability.
